

## Port of Tillamook Bay

### Community Profile

County Tillamook  
 City Tillamook  
 Population 4,885

### Assignment

Organization Port of Tillamook Bay  
 Supervisor Michelle Bradley  
 RARE Member Garrett Jensen

### About the Port of Tillamook Bay

Port of Tillamook is a special district focused on the creation and sustainment of jobs, primarily through the use of transportation infrastructure, land sales and leases. Port of Tillamook is the only Port Authority in Oregon not sited on water. Comprised of 1600+ acres of land zoned for industrial use just 2 miles south of the town of Tillamook, Oregon, the Port of Tillamook Bay is the largest tract of industrial land on the Oregon coast. The Port of Tillamook Bay is located on land that was formerly occupied by the U.S. Naval Air Station -- the home of blimp squadron during World War II.

Garrett Jensen is placed with the Port of Tillamook, where he will work with Port staff and representatives from various State agencies on the review and analysis of current Port zoning standards. After the initial review, Garrett will work through the application process and ultimately the update of existing zoning standards. He will review the Port's existing Comprehensive Master Plan, incorporating the last three years of capital improvements to create with a look to the Port's future for planning and growth. Lastly, Garrett will review current Port assets and create a working file and usable strategy for management and replacement of such assets.

### Meet Garrett Jensen

Garrett received his Bachelor of Science in Geography from the University of Wisconsin, La Crosse. After attaining his Bachelor's degree, Garrett spent his first year with the RARE program as the Community Development Specialist in The Dalles, where he supported the update process of Natural Hazard Mitigation Plans for three counties. Following his first year with RARE, Garrett enrolled in the University of Oregon's Community and Regional Planning program and received his Master's degree. Now in his second year with RARE, Garrett hopes to further enhance his research, communication, and planning skills, and to gain more experience in a professional setting. Following his second year with RARE, Garrett plans to pursue a career in the planning field.
